

off;

- In this position, it is often required of a Drill Push to complete and file daily paperwork and reports that will often need to be completed beyond the 12-13 hours per day

What is the Range of Pay?

Starting wage for Drill Push is approximately \$300.00/day. Most employers cover all accommodation costs while the employee is working, and a daily living allowance, called Hotshot, of \$40.00/day is given to each employee to be used for food. When interviewing with companies it is best to inquire if this benefit is offered.

Accommodation and Travel While on Shift

Crews either stay in hotels/motels that are close to the worksite, or if the program is taking place in a remote area where hotels/motels are unavailable, camps may be used. Camps vary depending on the managing company, and location. All meals in camp are included; therefore the daily living allowance of \$40.00/ day is not passed out. Camps typically include washroom facilities, recreation rooms (include exercise equipment, televisions, etc.) laundry, towels & bedding, and open kitchens.

Most of the time companies will provide transportation of workers from point of rest (hotel/ motel or camp) to the worksite; however depending on your roles and responsibilities you may be required to drive yourself from point of rest to the worksite.

Careers in Seismic

Drill Push

Position Name: Drill Push

Description of Position

- Responsible for all drilling rigs on the job;
- Responsible for all equipment and explosives;
- Responsible for ordering all necessary equipment and explosives;
- Responsible for safety on the job site, including safe handling of explosives;
- Reports to head office and to the client representative on site;
- A valid driver's license is an asset and may be required by some companies in order to obtain employment. Potential candidates should also be aware that a driver's abstract may be required;
- It should also be noted that some companies will require drug and alcohol testing prior to employment.

Training Requirements

There are no minimum educational requirements for the position of Drill Push on a seismic drill crew; however, a high school education is always a definite asset and is strongly encouraged. Candidates interested in becoming a Drill Push should note that to acquire Drill Push status they will first need to train as a Seismic Driller in order to gain experience.

Obtaining Blaster certification through Enform's Seismic Blasting course will help to make the transition into Drill Push come to fruition more quickly. To qualify for this course the employee must meet the following conditions:

- Minimum 18 yrs of age (19 to obtain a blasters permit in the NWT);
- Minimum six months hands-on experience as a Seismic Blaster in the past 36 months immediately preceding the date of application;
- Ability to communicate effectively in the

- English language, both orally and in writing;
- Current Standard First Aid certificate, or equivalent;
- Completion of the prescribed application form for the course.

Career Path and Advancement from the Position of Faller

A Drill Push has the opportunity to advance into various areas of operation (such as survey, line clearing, pipeline locating, recording etc.); if interests are in health and safety there is the opportunity to advance to field safety supervisors as well as corporate Health & Safety Advisors, human resources, field administration, project management etc.

Is On-The-Job Training Provided?

Initial training for those new to the industry may include, but is not limited to:

- Company orientations (review of company policies, procedures, expectations etc.);
- Basic Safety Awareness (introduction to petroleum industry hazards, tasks, safe work procedures, emergency response planning, communication, tools, driving, etc.);
- WHMIS (Workplace Hazardous Materials Information System);
- H2S Aware (awareness training for hydrogen sulphide gases);
- Transportation of Dangerous Goods (TDG);
- First Aid/CPR;
- General Oilfield Driver Improvement (GODI) (awareness training for operating vehicles 5500kg GVW and over);
- Off Highway Vehicle Training (ATV's, UTV's, snowmobiles).

With six months of on-the-job-training and experience a Driller's Helper may have the opportunity to take the Seismic Blaster's course offered through Enform. To qualify for this course the Driller's Helper must meet the following

conditions:

- Minimum 18 yrs of age (19 to obtain a blasters permit in the NWT);
- Minimum six months hands-on experience as a seismic blaster or seismic blaster assistant in the past 36 months immediately preceding the date of application;
- Ability to communicate effectively in the English language, both orally and in writing;
- Current Standard First Aid certificate, or equivalent;
- Completion of the prescribed application form for the course.

Obtaining Seismic Field Operations Supervisor (SFOS) certification from Enform is also a great asset to have when thinking about advancing into the role of Drill Push.

Additional Seasonal Training may be included such as:

- Wildlife Awareness (awareness training for dealing with wildlife);
- Cold Weather Awareness (awareness training for dealing with cold illnesses, clothing, blizzard conditions, appropriate footwear, industry hazards).

Generally most companies will provide their employees with up-to-date training in order to keep their skills current and up to the industry standard, however the responsibility may lie with the employee or potential employee to obtain some training courses on their own time.

Hours Worked/Standard Shift Rotation

- 12- 14 hours per day, seven days a week (includes travel time to and from the worksite, as well as lunches and breaks);
- Shift rotation varies from 21 days on/4 days off, 24 days on/4 days off, or 28 days on/7 days
